Safety

Kontra 350 is a modern boat made from polyethylene. It is designed for recreation and as a rescue boat. The boat can be used for inland water cruises (acc. to Polish Registry Office PRS – category D) and coastal waters (acc. to Polish Registry Office PRS – category C). The boat may also be used in hard-to-reach areas - floodplains, as a supporting rescue boat. Kontra 350 is bought by fishermen as well as holiday resorts, individual customers and fire brigades.

Polyethylene is a material that is completely resistant to weather conditions; it is not absorbing water, it's also very durable even in low temperatures and - thanks to such features - is much better than other materials as polyester resins, PCV or wood. Especially high impact strength causes this boat made from PE to be damage-proof, even when hitting the shore or rocks on the riverbed. Polyethylene boat doesn't need to be painted or preserved and therefore even in case of intensive use shall remain its' good condition for many years.

Polyethylene is a material lighter than water. Additionally the boat has a 2-section hull (double bottom) and many buoyancy chambers. A hull V – type with side floats as in catamaran ensures the boat stability as well as speed and agility.

Even if this boat is turned upside down and fully filled with water, it stays on the water surface and the crew is safe all the time.

Kontra 350 is a Polish design joining advantages of pontoons RIB type with comfort of spacious buoyancy boats.

# KONTRA 350

## Basic equipment:

- steel railing
- bow locker
- steel transom
- 2 stern cleats
- drain plug

## Available additional accessories:

- removable side storage lockers
- wooden bench
- fisherman seat
- bow and stern lift
- open locker for fuel tank/battery
- paddles/oars
- fishing rods rack
- fishing rod holder
- folding stern ladder
- bimini tent
- steerman seat
- passenger seat
- steering console with a wheel, gear, steering system, 2-function shifter, ties
- navigation frame with a lifebuoy holder, encapsulated lifebuoy line and other equipment

## Technical data:

- The boat is CE certificated by Polish Registry Office (PRS):
  - category C – (coastal waters) capacity – 4 persons (436 kg)
  - category D – (inland waters) capacity – 6 persons (600 kg)
- Weight – 130 kg
- Max engine power – 25 KM – 18 kW
- Hull material – LDPE
- Hull construction – 2-section closed
- Total length – 3,50 m
- External width – 1,60 m
- Height – 0,79 m
- Length in waterline – 3,15 m
- Max width in waterline – 1,50 m
- Freeboard at the max load limit
  - 0,55 m category C
  - 0,35 m category D

Available colours (other colours and mix colours sets on request).
