KONTRA 450

Safety

Maneuverability

Stability

Our new boat Kontra 450 is an excellent choice for people looking for recreation on water. It is also great for rescue services, such as fire brigades, water rescue services or the Police.

New Kontra 450 is by 1 meter longer than the previous boat type, it is also very spacious – it can take aboard up to 10 people.

In its version devoted to rescue services, there is plenty space for all the necessary equipment and people in need. Extraordinary durability and slight immersion makes Kontra 450 an ideal boat to be used in floodplains and also in such conditions as shallow waters, with objects in the river bottom – stones, wood pieces etc.

Individual users – while ride a boat just for fun – will surely appreciate Kontra 450 for being spacious, her great performance and sporty looks

Kontra 450 is a perfect combination of typical RIB and comfortable safe boat. It has all the features of both types, without their weaknesses.

Kontra 450 is practically undestroyable, with double 2 section hull, made of polyethylene that is as a material – lighter than water, so it floats on water even if perforated.

You can always feel safe on Kontra 450 , our boat doesn't require any special treatment such as conservation or painting.. just cleaning with water and brush will do

Thanks to its features – Kontra 450 gives the user lot of pleasure and safety at the same time.
